

GlobalSCAPE® Hosted Enhanced File Transfer Server™

*Reduce costs and increase efficiencies with
a hosted SMB information exchange solution*

GlobalSCAPE® Hosted Enhanced File Transfer Server™ (Hosted EFT Server™) enables your organization to securely exchange business-to-business data, including large files and sensitive data. This hosted file transfer service integrates GlobalSCAPE's market-leading Enhanced File Transfer Server (EFT Server) solution with proven infrastructure from one of the world leaders in the hosting and cloud computing industry.

This tiered service allows you to host all or part of your complex and demanding information exchange needs to reduce costs, increase efficiencies, track and audit transactions, and provide a greater level of security and compliance. We offer multiple solution tiers to suit your business demands.

Hosted EFT Server benefits small and medium businesses seeking an alternative to on-premises managed file transfer (MFT) implementations. This service complements our other on-premise solutions and provides compelling value by delivering our industry-leading MFT capabilities through a secure and scalable cloud-based infrastructure.

Hosted EFT Server™ Tiers:

Tier 1 includes:

- FTPS
- SFTP

Tier 2 includes:

- FTPS
- HTTPS
- SFTP
- High Security Module (HSM)
- Auditing and Reporting Module (ARM)
- Web Transfer Client (WTC)

Key Benefits:

- **Market-leading features and security capabilities** of GlobalSCAPE's EFT Server solutions adopted by thousands of customers worldwide
- **Robust MFT features** including management, automation, and auditing of all file transfer activity for meeting security and compliance mandates
- **"Pay as you go"** flexible and affordable pricing that helps customers eliminate upfront capital expenditures
- **Reduced ongoing maintenance expenses** including hardware, software, and utility services costs
- **Improved IT infrastructure reliability and performance** enabled by the Rackspace global infrastructure
- **Rapid deployment** to meet your business demands

Features and Security Capabilities

Hosted EFT Server offers the following capabilities in addition to the standard features of our EFT Server:

- 24 x 7 infrastructure management
- Uptime Service Level Agreements (SLA)
- Automated server patching
- PCI DSS compliance reporting
- Fully managed firewall infrastructure
- SAS-70 Type 2 hosting environment
- Customer retains administrative control
- Fixed cost for length of term
- Generous bandwidth and storage allotment
- Demonstrated migration path to GlobalSCAPE enterprise solutions
