CAIRN India Revamps File Transfer Strategy with Globalscape®

"With the EFT platform, we now manage all file transfers internally. The technology is easy to use and EFT's automation features eliminate the taxing administrative work associated with manual FTP file transfers."

Shakti Prakash - Senior Information Security Manager at Cairn

Energy for India

Enhance Security and Efficiency of Mission-Critical Transfers

For more than 15 years, Cairn, the world's fastest-growing energy company, according to Platts, has played an active role in developing the oil and gas resources of India.
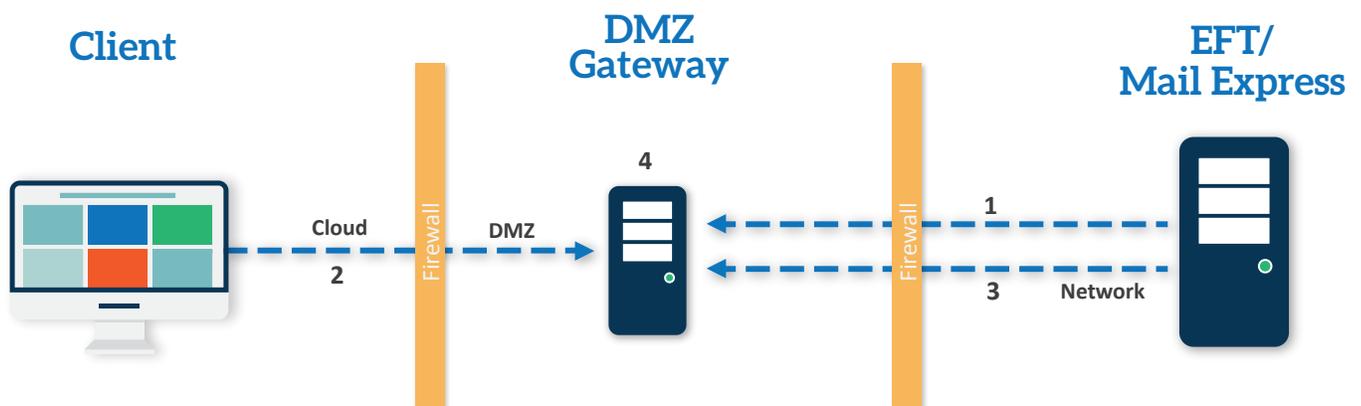

To continue its rapid growth, Cairn India needed a managed file transfer solution that would streamline and protect the sharing of digital assets and sensitive files with customers, prospects, and internal employees. Previously, Cairn India employed an external vendor's FTP server to transfer files. The process, however, was difficult and resource intensive to use, and lacked the necessary security protocols to keep Cairn India's sensitive files protected.

Improving the file transfer system was a critical business initiative, as the company routinely transferred more than 200 files per day.

"We were wasting significant resources by manually transferring files through FTP. Our team needed a new system that would streamline internal operations, enhance security, and accelerate our growth initiatives," said Mr. Shakti Prakash, senior manager of Information Security at Cairn. "Globalscape's Enhanced File Transfer platform saved our team valuable hours every week and protected our customers' most sensitive assets."

Client   DMZ Gateway   EFT/ Mail Express

Client — Firewall — Cloud / DMZ — 2 — DMZ Gateway (4) — Firewall — 1 / 3 — Network — EFT/Mail Express

1. EFT or Mail Express establishes an outbound, persistent communication channel to the DMZ Gateway.
2. Partner connects over any protocol to the DMZ Gateway.
3. EFT or Mail Express opens a new outbound session to the DMZ Gateway.
4. DMZ Gateway brokers the connection.

Implementing a Secure, Easy-to-Use Gateway

Globalscape's Enhanced File Transfer (EFT) software provided Cairn India with a secure, manageable gateway to exchange sensitive data and large files without overtaxing infrastructure bandwidth. Specifically, Globalscape enables Cairn to:

> Quickly, easily, and automatically transfer large batches of files among global offices, clients, and partners

> Keep digital files and business-critical information secure and protected

> Gain visibility into all files moving inside and outside of the organization

> Maintain compliance with government and corporate regulations

"With the EFT platform, we now manage all file transfers internally. The technology is easy to use and EFT's automation features eliminate the taxing administrative work associated with manual FTP file transfers," said Mr. Shakti Prakash.

Cairn India is part of the Vedanta Group, a globally diversified natural resources group with wide ranging interests in aluminum, copper, zinc, lead, silver, and iron ore.

About Globalscape

Globalscape ensures the reliability of mission-critical operations by securing sensitive data and intellectual property. Globalscape's suite of solutions features Enhanced File Transfer™, the industry-leading enterprise file transfer platform that delivers military-grade security and a customizable solution for achieving best-in-class control and visibility of data in motion or at rest, across multiple locations. Founded in 1996, Globalscape is a leading enterprise solution provider of secure information exchange software and services to thousands of customers, including global enterprises, governments, and small businesses.
